

Greenergy Fuel Quality Statement

28th February 2007

Greenergy is aware of the reports from drivers who are experiencing problems after filling up with fuel in the South East of England. We take quality very seriously and we are doing everything we possibly can to find out what the issue is and whether it is related to us. Over the last 3 years we have sold more than 8 billion litres of fuel into the UK market and have not had any problems. So far we have conducted extensive tests on the fuel supplied to Tesco and Morrisons. We have found it is fully compliant with BS EN 228 – the independent standard everyone works to. We are continuing our investigation and will update you as soon as we have more information.
