

**PRESS RELEASE**

London, 27 January 2011

**Greenergy named sector winner by Forest Footprint Disclosure in recognition of its CSR leadership**

Greenergy, one of the largest suppliers of road fuel and related services in the UK, has been selected as sector winner by Forest Footprint Disclosure (FFD) in recognition of its leadership role in the corporate social responsibility agenda.

FFD encourages companies to provide information about their supply chain policies in order to improve corporate understanding of the "forest footprint" of key commodities. Greenergy was one of only three companies in the international oil and biofuel sectors to have provided this disclosure.

Andrew Owens, Executive Chairman said:

"We are committed to providing detailed information about the origin of our biofuels - not just to FFD, but also through BioCarbon Tracker and our own website. Like FFD, we see disclosure as an end in its own right, a driver for continuous improvement."
