

Fuel supply
wherever you are

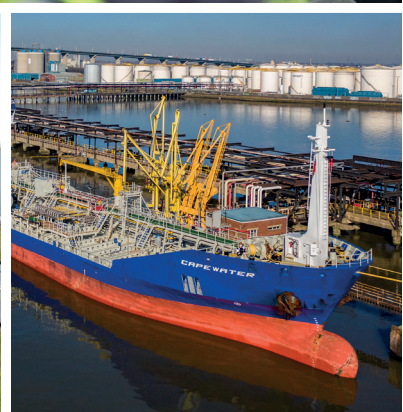

Greenenergy

The Greenergy Way

Delivering safe, efficient and reliable fuel solutions for our customers.

We aim to be a leading transportation fuel supplier, by integrating traditional and renewable energy solutions.

What we do

We manage fuel supply chains from refinery gates to customer sites – importing, storing, blending and distributing fuel and managing stock levels for our customers.

As a leading European producer of waste-based biodiesel, Greenergy continues to invest in lower carbon fuels to support the energy transition.

Over
15 bn
litres of fuel
supplied per year

Over
5.7 mt
of CO₂e saved
from the biofuels
we supplied

Over
500
deliveries managed
per day

Around
1 in 4
cars in the UK
supplied with
Greenergy fuels

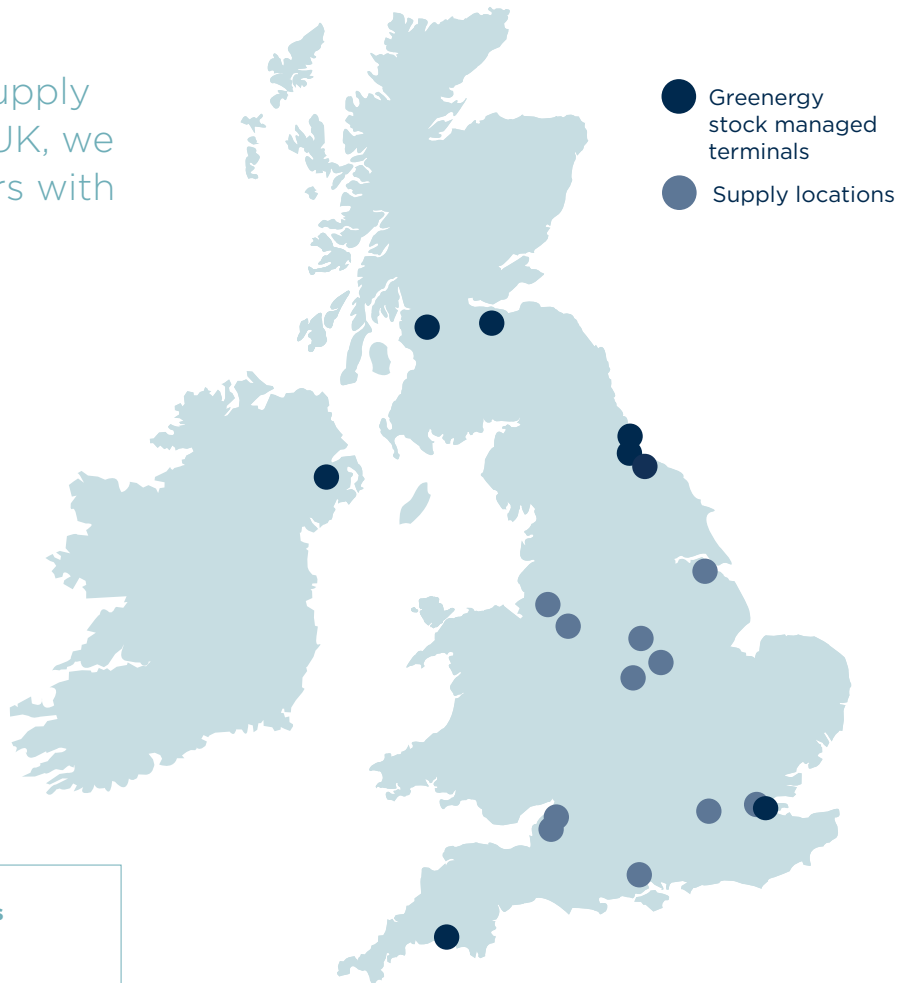

Unique supply capability

With more than 20 supply locations across the UK, we provide our customers with reliable fuel supply.

Supply resilience

Our national supply footprint allows us to optimise our scheduling to ensure cost-effective and reliable supply.

Terminals

Exolum Clydebank
Exolum Grangemouth
Exolum Seal Sands
Greenergy Plymouth
Impala Belfast
Navigator North Tees
Navigator Seal Sands
Navigator Thames

Products

- Petrol
- Diesel
- Super unleaded
- Gasoil FAME O
- Gasoil
- High bio blends
- HVO
- Kerosene
- Marine gasoil

Greenergy Flexigrid

Our in-house haulage and logistics operation, Greenergy Flexigrid ('Flexigrid') provides customers with flexible haulage solutions. This includes fuel with distribution or standalone distribution across both commercial and retail sectors.

The Flexigrid fleet is made up of over 200 tankers and over 600 drivers, operating from key locations nationwide to ensure supply resilience for our extensive customer network.

Flexigrid offers:

- » Resource capability at all key loading terminals
- » Customer services and scheduling support from our Manchester and Tamworth offices
- » Real time scheduling with automatic ETAs by email and text
- » Stock management solution.

Over
200
tankers

Over
600
tanker drivers

Over
20
depots nationwide

Renewable fuels

We supply lower-carbon fuel solutions to support our customers' decarbonisation journeys

Greenenergy offers a range of fuel solutions to help customers reduce their emissions. High bio blends (B20) and HVO (renewable diesel) can be used in existing diesel vehicles without modification.

Greenenergy's high bio blends range from B20 (containing an average of 20% biodiesel) to B100. These fuels displace conventional diesel and reduce transport emissions compared with standard grade diesel, which contains up to 7% biodiesel.

Our high bio blends (B20):

- » Are more affordable than hydrotreated vegetable oil (HVO)
- » Deliver immediate CO₂e savings
- » Readily available from dedicated loading tanks across the UK
- » Deliver the same performance as B7 diesel
- » Compliant with the European Biodiesel Standard, EN16709 (B20/B30).

HVO:

- » Reduces carbon emissions by up to 90% compared with standard B7 diesel
- » Made from renewable feedstocks
- » Delivers immediate CO₂e emissions savings
- » Can be blended to meet specific customer requirements.

Using high bio blends in a commercial fleet

As part of Greenergy's own transition plans, our in-house haulier, Greenergy Flexigrid ('Flexigrid'), have introduced high bio blends, B20, across a portion of the fleet.

In addition to reducing emissions from our own fleet operations, we have been able to demonstrate in real world conditions the impact of switching a commercial fleet to a high bio blend.

Key findings:

- » An annual average 13% greenhouse gas emission improvement above standard B7 diesel
- » 609 tonnes CO₂e saved using B20 across our Flexigrid fleet compared to using B7 diesel
- » Cost savings per litre of B20 compared to B7
- » No operational issues recorded
- » Positive response from drivers and stakeholders.

Following the success of B20 we are expanding our bunkering capability and the use of high bio blends across our Flexigrid fleet.

Fuel supply wherever you are

Leveraging our global supply chains and established infrastructure, we deliver reliable, flexible fuel solutions safely, efficiently and on time.

Reliable supply

We work to earn the long-term loyalty of each and every customer through supply resilience and by offering:

- » End to end supply chain control, from refinery gates to customer sites
- » Multiple supply locations in each region to ensure supply resilience
- » Optimal/real time scheduling to ensure cost effective and reliable supply
- » Term contracts and spot sales available nationally.

Dedicated support

Our dedicated and experienced commercial sales team offer complete account management including:

- » 24/7 customer care and logistics support
- » Inventory management and fully managed delivery service
- » Site by site or national pricing mechanism
- » Weekly client market data reports
- » Monthly KPI reports.
