

Greenergy Kamloops

Our Kamloops supply point offers reliable, local fuel supply to the south-central British Columbia area.

About us

In business for over 30 years, Greenergy is an international fuel supplier. Our global supply chain and terminal network enable us to source and supply fuels from multiple locations, minimizing our dependence on any single refiner.

Superior supply reliability for our customers.

We will make every effort to provide you with the best combination of price and service and work to meet the specific needs of your operation.

Our Surrey supply location in partnership with CN CargoFlo offers customers an intermodal, diesel supply location with fully automated truck loading and enhanced blending capabilities lowering gate-to-gate times. Additionally, railcar gantry at each offload position allows operators to safely access the top of railcars without hindering movement.

Quality fuels offered

Our Kamloops supply location offers an efficient truck loading alternative for:

- » Mining diesel
- » Locomotive Diesel
- » Ultra-low sulfur furnace oil (ULSFO)
- » Diesel (ULSD) clear and dyed.

All Greenergy fuels go through effective quality processes and procedures.

Our fuel is tested by independent third-party labs to confirm its quality standards.

Safety

Safety underpins everything we do. We create safe working environments by continually working to identify, assess and mitigate the risks associated with our operations.

We encourage and empower every individual working across the business to observe and report hazards, near misses or unwanted events, however small, without fear of blame.
