

Marine gasoil Q+As

Q: What specification of marine gasoil (MGO) does Greenergy supply?

A: We supply FAME Free Diesel 10PPM meeting BS EN590 standard with guaranteed flash and density to meet MGO specification. Product is marked in line with HMRC guidelines.

Q: Where is marine gasoil currently available from?

A: Greenergy is supplying from Clydebank, Scotland, on a spot only basis.

Q: Can I purchase marine grade fuel in different units of measure and currencies?

A: No. Sales are based on standard litres and prices are only provided in pence per litre inclusive of duty.

Q: Will there be regular supply of marine grade fuel available?

A: Yes, however, product will be sold on a spot only basis and availability is not guaranteed.

Q: What happens if marine grade fuel is unavailable?

A: We will notify customers in advance of any deviation from marine spec material.

Q: What is the lifting period for marine grade from Clydebank?

A: The maximum loading period is 7 days. Volume purchased must be lifted in full by the end date specified on your order confirmation. In the case that the buyer fails to lift or take delivery of the agreed quantity over the contract period, any associated cost related to the quantity shortfall will be for the buyer's account.

Q: Do you share quality certificates?

A: CQ's and flash point test results and are available upon request.
