

Greenergy Johnstown

Greenergy's latest unique and innovative Trans-Flex fuel terminal provides local fuel supply and reliability to Eastern Ontario.

Commissioned in March 2020, and in partnership with Canadian Rail Equipment Work & Services Inc. (CREWS), the rail and truck fed terminal is located within the CREWS Johnstown rail yard, just south of the 401.

Quality fuels offered

The terminal offers 24/7 truck loading capabilities for the following quality fuels:

- » Conventional gasoline
- » Gasoline blended with ethanol (E10)
- » Premium gasoline (PUL)
- » Diesel (ULSD) clear and dyed

TOP TIER™ detergent gasoline approved fuels are also available.

All fuel supplied goes through our effective quality process and procedures. We ensure fuel is tested by an independent third party lab prior to taking receipt, confirming the quality meets or exceeds government standards.

Fuel is brought into the terminal from various locations in Canada and from the US mid continent.

Safety

Safety underpins everything we do. We create safe working environments by continually working with our partners to identify, assess and mitigate the risks associated with our operations.

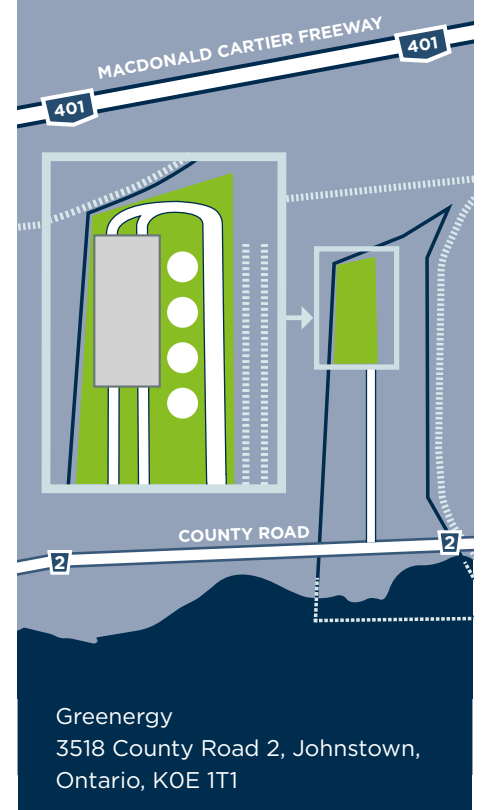

2020 KPIs*

We understand the importance of reliable supply for our customers. To keep you informed, we continuously evaluate and monitor KPIs at our Johnstown terminal:

2020 product availability: 98.75%
2020 gate-to-gate time: 23 minutes
